## ABOUT ME

Architect turned software engineer - I am a recent Makers Academy graduate keen to learn new skills and excited to apply myself in a full-stack junior software engineer role. As a very creative and sociable professional, I love coming up with new ideas and realising them with a group of like-minded people. Strong team player, I also led teams for several years on various projects from brief to completion. Solving complex problems that involve the interests of several parties was a day-to-day part of my job. With my previous experience as an Architect and newly acquired skills at Makers Academy, I am looking forward to working in a new friendly environment to make amazing projects come to reality.

## SKILLS

- Object-Oriented Programming(OOP)
- Test-Driven Development(TDD)
- MVC pattern
- Debugging fundamentals
- Pair programming
- Agile/XP

## TECHNOLOGIES

- Languages: Ruby, Javascript, HTML, CSS, SQL
- Frameworks: Ruby on Rails, React Native
- Testing Tools: RSpec, Jasmine
- Libraries: React, Sinatra, JQuery
- Database Systems: MongoDB, Postgresql
- Node.js
- APIs

## PROJECT EXAMPLES

No	Name	Description	Technologies
1	<a href="#">FitLyst</a>	A mobile app that allows the user to create customized workouts.	React Native, JS, Jest, MongoDB, Mongoose, Expo, Express
2	<a href="#">Knitter</a>	A Facebook clone web app for knitting enthusiasts.	Ruby on Rails, JS, HTML, CSS, RSpec, Heroku
3	<a href="#">Hammocks N' Drinks</a>	An AirBnB clone for renting hammocks in space.	Ruby, Sinatra, Postgresql, RSPEC, Capybara

Kyiv, Ukraine 2006 - 2008

## EMPLOYMENT

### Squire and Partners

Architect 2016 - 2021

Part II Architectural Assistant 2013 -2016

## PROFESSIONAL SKILLS

- **Teamwork and Leadership**

I have plenty of experience leading and participating in various teams of people. Enabling the projects to evolve in a fun yet efficient way is what I find most enjoyable. A believer that sharing quality information and coaching is essential for a healthy working environment.

- **Problem Solving and Analysis**

I can quickly analyse new situations to see the necessary constraints and swiftly move on to figuring out the best way forward. The range of problems I dealt with is very broad: from devising a brief with the client to dealing with construction issues on site.

- **Creativity and Design Skills**

Studying and working in Architecture for many years, I have very strong design skills. An urge to achieve the cleanest, neatest, and most aesthetically pleasing solution is now ingrained in me forever. Being playful and curious in the initial stages of design helps to achieve a truly unique outcome.

- **Fast Learner**

At the Makers course, we were given tonnes of new information, and I was able to filter through and organise it in a useful way to achieve various goals. Challenges are opportunities for self-improvement.
